

Course Syllabus

Course: Data Structures

Teacher: Li Qiang

File id: mock-wjid-101 (mock=101)

Sample index: page 1 of 3

1. Course overview

This sample PDF is produced by scripts/gen-mock-files.mjs and bundled into the app as entry/src/main/resources/rawfile/mock-files/.

It exists so that a mock-mode download writes a real, openable file.

2. Prerequisites

Programming fundamentals. No prior C experience is required.

Course Syllabus

Course: Data Structures

Teacher: Li Qiang

File id: mock-wjid-101 (mock=101)

Sample index: page 2 of 3

3. Schedule (16 weeks)

Weeks 1-4 Lists, stacks and queues

Weeks 5-8 Trees, heaps and balanced search trees

Weeks 9-12 Graphs, shortest paths and spanning trees

Weeks 13-16 Sorting, hashing and an introduction to complexity

4. Midterm

Week 9, Wednesday 19:00 - 21:00. Room to be announced.

Course Syllabus

Course: Data Structures

Teacher: Li Qiang

File id: mock-wjid-101 (mock=101)

Sample index: page 3 of 3

5. Assessment

Homework 40%

Midterm 25%

Final examination 35%

6. Textbook

Mark Allen Weiss, Data Structures and Algorithm Analysis.

7. Contact

Li Qiang, Department of Computer Science. Office hours by appointment.
